Dubuque and Jackson County Habitat for Humanity offers sponsorship opportunities for volunteer groups that combine hands-on service with meaningful community impact. Sponsorship volunteer groups participate in scheduled build days that include lunch for volunteers and guided support from Habitat staff. No prior construction experience is required, as all tasks are suitable for beginners and on-site training is provided. To ensure a safe and high-quality build experience, volunteer groups are limited to 10–12 participants per day due to staff capacity, and larger groups will be divided across multiple build days as needed. Please note that build days may be scheduled over multiple, non-consecutive days, depending on construction timelines and availability.
